

PRESS RELEASE of 18.02.2011

A new dimension in navigation

The new Becker Active 43 Transit for trucks, buses and motor homes

Right on time for CeBIT 2011, United Navigation is expanding the Becker Active series to include a model for vehicles that are demanding when it comes to navigation: trucks, buses and motor homes. Like no other navigation system, this long-distance specialist takes drivers safely to their destinations on routes that are ideal for their vehicles - thanks to different profiles. By reflecting vehicle specifications, weights and information about trailers and loads with hazardous goods classifications, roads unsuitable for the vehicle are automatically avoided. The navigation system is equipped with the Becker EasyClick active holder and an integrated Bluetooth® hands-free device. The Becker Active 43 Transit will be available at the beginning of March 2011 for a recommended retail price of 259 euros.

Playing it safe - enhanced route navigation, hands-free device and 3D

Becker's flat navigation system is a specialist when it comes to bus, truck and motor home navigation, because users can store, modify and retrieve special vehicle profiles. On its non-reflecting, 10.9 cm touch screen, the new special navigation device shows the route selected clearly and in detail. Becker Active 43 Transit's simple instructions allow users to select and change the method of travel with one single click. At the same time of course, it is also possible to select traditional car navigation. The traffic lane assistant with 3D crossing view at key motorway junctions, as well as direction pointers on major highways, also helps drivers to adopt a forward-looking style of driving. The display and acoustic alarm for important warning and traffic signs on main roads is helpful too.

3D terrain view of the surroundings and height profiles support the driver in adjusting speed to suite the route and vehicle. To overcome legal restrictions on using mobile phones with no hands-free device while driving, the navigation system has a Bluetooth® hands-free device to connect to and use Bluetooth® capable mobile phones. The navigation device has a durable ice-grey/grey finish and maps for 43 European countries. It also offers an integrated TMC radio traffic receiver so that traffic jam can be automatically avoided. Thanks to the Becker

BestTracks function which displays three advisable alternative routes at the touch of a button, the preferred route can be selected at the start of the journey already.

Practical and fast - Becker EasyClick active holder

It is not just the sophisticated profiles for different vehicles that make the Becker Active 43 Transit the perfect buddy on the road. The clever Becker EasyClick active holder also offers convenient functions: with one simple click, the navigation device is connected with and can be removed from the active holder. The recharger cable with integrated TMC aerial is connected directly to the active holder, so that annoying jobs like connecting and disconnecting the cable from the device are a thing of the past.

Always up to date - update guarantee and maps for a special price

If requested, extra maps or premium traffic information services (Navteq Traffic) can be downloaded onto the Becker Active 43 Transit using the online store MyXtras and the software included. Because the navigation device has a 4 GB memory there will be no problems at all. Anyone registering online within 45 days after first usage will even receive free updates for the most up-to-date European maps. At the same time, important information for trucks and motor homes, such as changes in vehicle bans are updated. The manufacturer provides regular new maps for a two-year subscription at a special price of 49.95 euros. To do so, users must register within 30 days after using the system for the first time. The right speed camera data is currently on offer to download for free until 30 April 2011 from the Becker Online shop.¹⁾

Prices and availability

The Becker Active 43 Transit will be available from retailers at the beginning of March 2011 and in the Becker Online Shop (<http://shop.mobilenavigation.mybecker.com/home/>) at a recommended retail price of 259 euros.

Please note:

- ¹⁾ In some European countries (including Germany, Austria and Switzerland) installing and using the Blitzer data is prohibited and/or constitutes an offence. Before installing the Speed Camera Warning, customers must be aware of applicable legislation and any legal consequences. United Navigation GmbH accepts no liability for the legality of the installation or the usage, as well as the accuracy and completeness of the Blitzer data in the software.

About the Becker trademark

Becker is a registered trademark of Harman International Industries, Incorporated. United Navigation GmbH has been licensed by Harman International to use the Becker trademark for portable navigation systems since January 2010. An established brand, Becker can look back on a successful history. Becker's name has been synonymous with unique developments for over 60 years. Thanks to its technical innovations in the areas of car hi-fi, infotainment, in-car navigation and telematics, the Becker trademark is regarded as a market leader in innovation.

About United Navigation GmbH

United Navigation GmbH develops and sells navigation hardware and software. Based in Ostfildern near Stuttgart, the company serves three business areas: portable navigation devices for private customers under the Becker and Falk trademarks, complete systems for corporate fleet management and permanent installation solutions for the automobile industry. The devices use a variety of award-winning technologies, such as "Falk Learning Navigation" and "Becker One-Shot Voice Control". Different series of the Falk navigation systems use the high-quality content of the digital travel guides from the MAIRDUMONT publishing group.
